

Ask the audience. They'll tell you the same thing.

What is a way to minimise the risk of clogging and blockages in your air-seeder when applying a starter fertiliser?

A: Sow extra slow

B: Keep a plunger handy

C: A home-made pipe cleaner

D: Use a high-quality fertiliser, Granulock®

Some choices are easier than others, especially when you already know the tried-and-tested answer is Granulock from Incitec Pivot Fertilisers. Each granule has the ideal balance of nutrients and physical attributes, so application is hassle-free. It's why Granulock is recognised as the consistent high-quality starter fertiliser you can't go without.
